

## #Senior Full Stack Software Engineer - Microsoft Threat Protection

[Apply Now](#)

Company: Microsoft

Location: Nazareth

Category: other-general

### Overview

Security represents the most critical priorities for our customers in a world awash in digital threats, regulatory scrutiny, and estate complexity. Microsoft Security aspires to make the world a safer place for all. We want to reshape security and empower every user, customer, and developer with a security cloud that protects them with end to end, simplified solutions. The Microsoft Security organization accelerates Microsoft's mission and bold ambitions to ensure that our company and industry is securing digital technology platforms, devices, and clouds in our customers' heterogeneous environments, as well as ensuring the security of our own internal estate.

The Microsoft 365 Defender suite leverages the Microsoft 365 security portfolio - including Microsoft Defender for Endpoint, Office, Cloud Apps, Identity and IoT/OT, as well as Microsoft Sentinel and XDR - to automatically analyze threat data across domains, building a complete picture of each attack in a single dashboard to monitor, hunt, detect and remediate threats. With this breadth and depth of clarity defenders can now focus on critical threats and hunt for sophisticated breaches, trusting that the powerful automation in Microsoft's security products detects and stops attacks anywhere in the cyber-attack kill chains and returns the organization to a secure state.

We use state of the art cloud technologies, big data solutions, AI at hyper scale and modern UX platforms to deliver the highest value for our customers.

If you're passionate about cyber security like us, and if you live and love data, want to make the world a safer place for millions of customers, love creating products for and with

customers and are a team player - come join us.

### **Qualifications**

B.Sc./M.Sc. in Computer Science (or equivalent)

7+ years of software development experience

2+ years of experience with HTML5, JavaScript, and CSS/LESS/SASS

2+ years of experience with modern JavaScript frameworks such as Angular or React

Autodidactic abilities to ramp up quickly on new technologies

Knowledge in one of the following is an advantage:

Experience with .NET/C#.
