**#Senior Software Engineer - Microsoft Defender for Cloud**

**Apply Now**

Company: Microsoft

Location: Herzliyya

Category: other-general

## Overview

If you're up to disrupt #CloudSecurity, come join us at the world's leading security company at Microsoft Defender for Cloud group!

At the Microsoft Cloud Security team, we take immense pride in developing a diverse set of security products and services that are leaders in their respective market segments. Our innovative solutions have set new industry standards, earning global recognition safeguarding critical infrastructure at the highest scale.

Microsoft Defender for Cloud is a cloud-native application protection platform (CNAPP) designed to protect cloud-based applications running in all major cloud providers.

Microsoft Defender for Cloud secures cloud applications from code-to-cloud by unifying development security operations (DevSecOps) at the code level, cloud security posture management (CSPM) to surface and prevent breaches and cloud workload protection platform (CWPP) to identify, alert and block real-time cyber-attacks worldwide.

We're a diverse group of talented professionals consisting of software engineers, security researchers, program managers and data scientists collaborating to develop products that secure our customers, including the biggest companies in the world.

You will work in a supportive and inclusive environment where you will learn and work alongside the best and brightest minds in the industry, and have the opportunity to make a significant impact, grow your skills and advance your career.
