

Algo Developer

Apply Now

Company: Pixellot

Location: Israel

Category: other-general

Are you passionate about real-world AI solutions? A team player and have great coding skills? Join our top-notch Computer Vision AI Algorithm group at Pixellot and help us revolutionize sports production. Pixellot's automated sports production solutions revolutionize traditional video capture, production and distribution processes, enabling professional and amateur sports organizations to affordably cover and monetize their events. As an AI algorithm developer you will have an direct impact over the company's activity and success. You will take part in Computer Vision and Machine Learning development for Pixellot's products: objects and events detection, recognition, and real-time automatic production for an unmanned camera system. As part of your role you will: Research and develop Computer Vision and Deep Learning based algorithms to be integrated into Pixellot's products Implement real time algorithms on edge platforms, while considering constraints such as computation resources, response time, memory consumption, etc. Work and cooperation with All-star teammates across our R&D group. You should bring with you: M.Sc degree from a prominent academic institute (relevant fields: Electrical engineering/ Computer Science / equivalent) Proven industry experience in deep learning and machine learning for computer vision tasks Excellent programming skills Proficiency in python and deep learning platforms (e.g. keras / tf /pytorch) Strong independent work and self-learning abilities. Advantage: Proficiency in C++ (or equivalent OOP) – Big Advantage Experience with video and real-time algorithmic development GPU computing (e.g., OpenCV), with parallel considerations <https://www.mako.co.il/news-channel12?subChannelId=2ffadf3df6d62710VgnVCM200000650a10acRCRD&vcmid=77ecaebb86523710Vgn>
