

Backend Python Team Leader

[Apply Now](#)

Company: Software

Location: Ramat Gan

Category: other-general

The position

Mobileye is looking for a leader to join a team that is building a state-of-the-art Data Platform. The autonomous vehicle projects are generating huge amounts of data, and our challenge is to enable it for usage by the entire organization (Deep Learning/Machine Learning developers, Product Managers, Analysts, and more). We are using a top-notch tech stack to solve problems – multiple databases, big data and web frameworks, AWS infrastructure on a large scale, and many more.

What will your job look like:

Set objectives and goals over multiple strategic projects.

Planning sprints and roadmaps, allocating resources, identifying risks and bottlenecks.

Foster the team's culture, promote collaborations, and provide mentorship to and support to team members.

Work closely with product managers and other R&D team to define new features and capabilities.

Take part in the design & development of a multi-service cloud-based big data platform.

At least 50% hands on – developing code and conducting CRs.

All you need is:

Bachelor's degree in computer science or equivalent degree

4+ years of software development experience

Strong skills in Python

Experience in developing backend services with known frameworks (Django, Flask, or any similar one)

Experience with databases (relational and schema-less), cache and efficient data modeling

Experience with containerized services

Advantages:

Previous experience as a manager or in a position involving leadership

Experience with AWS

Experience with one of the following solutions: Spark, Presto, Trino, Athena or Drill

Mobileye changes the way we drive, from preventing accidents to semi and fully autonomous vehicles. If you are an excellent, bright, hands-on person with a passion to make a difference come to lead the revolution!
