Company: Jobinfo

Location: Ezor Haifa

Category: other-general

Job Description:

For a young software company developing visual analysis tools based on Machine Learning technologies, with offices in the north.

* Research, invention, development, and integration of tracking algorithms (potentially utilizing deep learning).

* Research, invention, development, and integration of motion-prediction algorithms (potentially using deep learning).

* Semantic smoothing of object trails utilizing non-learning methods.

* Integration with C++ - based AV software.

* Testing and finetuning developed algorithms/models

* Auxiliary tasks such as developing tools to test and debug the algorithm(s) on an office machine.

* Additional R&D tasks.

Additional Positions:

Category:

Job Qualifications:

* B.Sc. in Computer Science, Applied Mathematics, Electrical Engineering or similar

* 1 year hands-on experience with deep-learning research and application.

* 2 years programming experience (Python/C++ or any high-level language).

* Up to date on recent developments in the field of deep learning.

* Experience with signal processing algorithms and techniques (e.g. Kalman filter).

* Probability theory, linear algebra, geometry, trigonometry at a B.Sc level.

Company Occupation:

High Tech

Company Size:

Small (0 - 50)
