Manager (for hiring):

Lior Mor

We are seeking a highly skilled and experienced **Tech Expert for our DevOps**

**Infrastructure team**, with specific expertise in managing application infrastructure.

As the Tech Lead, you will play a key role in designing, implementing, and maintaining the infrastructure that supports our applications, ensuring seamless integration of the components. You will lead a team of talented infrastructure engineers, drive automation initiatives, and ensure our infrastructure's optimal performance and security.

***What will you do?***

Develop and maintain deployment processes for applications, ensuring efficient and error-free releases

Implement automation tools and scripts to streamline the deployment, monitoring, and management of applications

Manage and maintain configuration settings for application components

Implement and oversee configuration management tools to ensure consistency across environments

Establish and maintain monitoring systems to track the performance and health of

applications and infrastructure

Work closely with development, operations, and security teams to ensure seamless integration of application infrastructure with other IT components

Respond to and resolve infrastructure-related incidents promptly

You will work on an application based on a Linux server (On perm)

You will have cross-product responsibility for CICD and the standard process

You will need to install a new environment and new technology based on customer requirements

## **All You Need Is**

### *Knowledge and Experience*

Bachelor's degree in computer science, Information Technology, or related field

Proven experience as a DevOps Engineer focusing on infrastructure, with expertise in Linux-based applications.

Strong knowledge of the Docker platform (K8, OCP)

Strong knowledge in one of the following applications (WebLogic, WebSphere , Oracle, Jenkins )

Strong capability to troubleshoot complicated problem

Ability to learn new technology and implement it in our environment

Strong expertise in Infrastructure as Code tools (e.g., Ansible)

Proficiency in scripting and automation languages (e.g., PowerShell, Python, Bash)

Excellent communication and leadership skills

### *Skills*

Ability to perform in a global company, in a multi-cultural environment

Strong organizational and time management skills

Ability to prioritize tasks effectively

Strong work ethic, proactive, self-motivated, and results-driven

Excellent communication and collaboration skills

Proficient in spoken and written English
