Company: Maof HR

Location: Tel Aviv-Yafo

Category: other-general

A global cybersecurity company is looking for DEVOPS

We are looking for our first DevOps, to join our R&D team in Ramat Gan.

What you'll do:

Design and implement infrastructure for multidisciplinary cybersecurity system, including cloud-based workload.

Build CI/CD pipelines, automating deployment of development, staging and production environments.

Design and provision observability stack for business-critical analysis.

Leverage managed solutions, open-source tools, and imply industry best practices to ensure an operational excellence of our products and services.

דרישות

At least 5 years of engineering or DevOps experience using cloud and on-prem Linux based systems (DevOps / SRE experience is a huge advantage).

Experience with Docker and with running containers in production environments.

Experience with modern (containerized) CI/CD solutions.

Experience with Python is an advantage.

Experience with IoT is an advantage.

An excellent collaborator with great communication skills, who can take part in a diverse cross-functional team.

The perfect candidate is someone who:

Is thrilled when they solve complex infrastructure and architecture problems.

Enjoys working with other team members and colleagues to solve infrastructure problems, build deployment pipelines, and stream data to the cloud.

Is driven by the desire to make a big impact.

Enjoys an enabling role, supporting the team's velocity and practices
