Experienced Deep Learning Algorithm Engineer

Apply Now

Company: Algorithms

Location: Haifa

Category: other-general

The position

You will be part of Mobileye's REM (Road Experience Management) department which is responsible for the automatic High-Definition map-making process, which is a key technology in Mobileye's autonomous driving and high-end Driving Assistance systems.This is achieved by massive crowdsourcing of drives data and cutting-edge parallel programming infrastructure, supporting huge algorithmic development. and REM's Algorithms teams are looking for Machine Learning Algorithm engineer.

What will your job look like?

Design, develop, and implement DL algorithms for solving complex mapping problems.

Collaborate with engineering and research teams in to solve real-life problems.

Participate in cutting-edge projects.

Optimize existing algorithms to improve performance and scalability.

Learn and keep updated on the latest relevant open field of research that is relevant to our day-to-day work.

All you need is:

B.Sc. in Computer Engineering, Electrical Engineering, Computer Science, related technical field from a leading institution

M.Sc. is an advantage

3+ Years of experience development and deployment of DL algorithms

Experience in GNN - an advantage

Ability to learn new technologies and techniques

Experience with AWS – advantage

Mobileye changes the way we drive, from preventing accidents to semi and fully autonomous vehicles. If you are an excellent, bright, hands-on person with a passion to make a difference come to lead the revolution!
