

Linux System Administrator

[Apply Now](#)

Company: IT

Location: Ramat Gan

Category: other-general

The position

Mobileye's IT department is supporting company's development in a cutting-edge environment with the latest and advanced technologies from network to storage, HPC, and data analytics. The team solves variety of complex problems, data analysis, design, and builds infrastructure to support the continuous industry growth and development demands. We are looking for an Ansible expert to join our team.

What will your job look like:

Review current Ansible platform and propose improvements

Develop, troubleshoot, and execute Ansible playbooks throughout the company.

Develop and conduct training programs to enhance the team's Ansible expertise

Troubleshoot and resolve issues related to the Ansible platform and its integration with other systems.

Provide Linux support for R&D teams.

Manage, track, report and execute support tickets.

Monitors system health and configurations to ensure system health and functionality.

Perform rotational on-call support.

All you need is:

Bachelor's Degree or equivalent experience

Expertise with Ansible and ability to assist customers with playbook troubleshooting.

Strong background in Linux / Unix Administration

High proficiency in script writing in Python and various shells.

Excellent problem-solving skills, with the ability to work independently and in a team

Experience working in an Agile environment

Experience using Git for Ansible source control

Experience with other DevOps platforms and tools - Jenkins, GitLab CI, Artifactory – A big plus

Mobileye changes the way we drive, from preventing accidents to semi and fully autonomous vehicles. If you are an excellent, bright, hands-on person with a passion to make a difference come to lead the revolution!
