

Machine Vision Algorithm Developer

[Apply Now](#)

Company: Jobinfo

Location: Karmiel

Category: other-general

Job Description:

For a hi-tech company developing products for the manufacture of electronic components, with offices in the North

What our Algo developers do:

The position Includes diverse scopes of work from innovation through roadmap and short-term features and down to supporting existing capabilities and providing problem analysis expertise.

Comprises multi-disciplinary (physics, mechanics, sys engineering and application) interactions and provides wide exposure to those fields as an integrated part of the job.

May require exciting short overseas travel to customer sites.

Our algorithm developers play an active and leading role in the entire development process - A One Stop Shop. From problem formulation through research and development and on to final product implementation within SW and algorithms frameworks. Our unique blend of activities exposes members of the team to vision, data and software tasks, enabling professional and personal growth in various disciplines.

Vision and data challenges span processing, manipulation and analysis of 2D and 3D sensory data as well as (big) Data Sets, while running across a heterogenous (CPU/GPU) complex distributed computing system.

Such challenges cover:

Automatic anomaly detection under challenging conditions

Classification and filtering

Object detection, registration and measurement

(Big) Data analysis and manipulation

Additional Positions:

Location:

Northern Israel, Haifa area

Category:

Job Qualifications:

M.Sc or Ph.D. in computer science, electrical engineering, physics, mathematics or equal

Passionate about innovation and keeping in tune with up to date trends

Work within a team and mentor others while being able to Independently lead a taskalgorithm project, including multi-disciplinary interaction

Visiondata (at least 3 years of experience):

Theoretical and practical knowledge of machine learning, deep learning and statistical analysis and modeling

Proficiency with a deep learning framework such as TensorFlowKerasPyTorch

Familiarity with and understanding of the classic image processing and computer vision field

Proficiency with Python and Matlab, including machine learning, machine vision and image processing librariesextensions

Coding (at least 3 years of experience):

CC++

MatlabPytho

Company Occupation:

Other, High Tech, Electro - Optics, Multidisciplinary, Semiconductor/capital equipment, Image Processing

Company Size:

Large (150+)
