

## R&D Embedded Software Engineer

[Apply Now](#)

Company: ACS Motion Control

Location: Israel

Category: other-general

### About The Position

Design and development of real-time embedded SW for motion control complex applications

Design and development of advanced Micro Controller applications

Support and maintenance of existing applications and code base

### Primary Duties and Responsibilities

Full software project life-cycle responsibility from definition to release

Writing high level spec, SRS, SDD, STR for software projects

Implementing features and infrastructure modules in embedded software and micro-controllers' environment

Participate in design and code reviews

Work in a team of highly skilled software engineers

### Requirements

B.Sc. (or last semester student) in Computer and Software Engineering

3-5 years of experience in development of embedded systems - advantage

Proven experience in C++ programming

Knowledge in operating system concepts

Experience in multi-tasking programming - advantage

x86 platform and real-time OS knowledge - advantage

Experience with motion and control systems - advantage

Excellent interpersonal skills - teamwork, communication, and interaction with peers,  
independent and quick to learn

Innovative and creative in solving complex problems

Fluent in English, both writing and verbal
