Company: Bullguard Israel

Location: Herzliya

Category: other-general

At BullGuard Israel, we make it simple to protect everything in your smart connected home. The Internet of Things (IoT) is expected to reach over 30 billion connected devices by 2020, of which over 43% will be used by consumers at home. We offer a custom-built solution to protect smart home WiFi network, giving our users the freedom to connect as many internet devices in their home without compromising on privacy and security. We are proud to be featured in magazines and conferences around the world. Our multi-award winning product Dojo was awarded “Best Connected Consumer Device” at Mobile World Congress and also ranked by Forbes as one of the Best CES Products that will be hot in 2018. The Opportunity Things are getting exciting at BullGuard, as we are growing at a rapid pace, and we’re just getting started! If you are motivated, intelligent, creative, and seek to work in a fast paced environment, this opportunity is for you! As a Scala Developer at BullGuard Israel specializing in IoT BigData security, you will design, build and deploy big data driven solutions based on state of the art machine learning and AI algorithms. You will create and maintain an optimal and scalable data pipelines architecture in real time environments. Qualifications: 2+ years’ experience developing in Scala or 4 years’ experience developing in Java and willingness to professionally convert to Scala. B.Sc./M.Sc. in computer Science, computer engineering or related field. Advantages: Experience with stream-processing systems with Apache Kafka streaming. Experienced with data driven/oriented scalable solutions using cloud services (preferably AWS). Experience in deployment and automation of Machine learning models in real time environments
