Company: WalkMe

Location: Tel Aviv-Yafo

Category: other-general

About the position

WalkMe (NASDAQ: WKME) is growing and we want you to join us! At WalkMe, we're not just the leader in digital adoption, we started the digital adoption revolution - enabling organizations to measure, drive, and act to ultimately maximize the impact of their digital transformation and accelerate the return on their software investment. And with over 2,000 clients, including more than a third of Fortune 500 companies, working with us daily, we're changing how enterprises interact with their technology.

WalkMe is looking for a **Senior Backend Developer** who is passionate about web and product, eager to solve complex problems and dreams of working with the BEST team.

You will join us in the journey of building an amazing product in the online user experience realm, and as a team member, your contribution will go beyond coding, as you will have a direct impact on the way we steer this ship on its crazy journey. We are looking for people who look at the world differently, people who are passionate about code, clean design, high performance and leading technology to the extreme.

If you are passionate about developing an innovative product, making an impact, and strive to work with the industry's brightest talent as part of one of the fastest growing and successful startups around – WalkMe is where you want to be!

What will you actually be doing?

A technical focal point for software development best practices and design of main components, services and systems

Work very closely with the business, dealing with 30% of Fortune 500 companies

Develop code that is used daily by millions of users

Investigate, implement and share new technologies and ideas.

End to end development of features and systems that are used daily by key stakeholders, both internally and externally.

Contribute to challenging server-side development with microservices architecture, using the industry's latest trends

What should you bring to the table?

6+ years of industry experience in building large scale cloud-based solutions.

3+ years of experience in NodeJS.

Experience with architecting and developing high performance systems.

Experience working on large code projects, shared by multiple teams.

Familiarity with React/Angular is advantageous.

Positive Can-Do mindset, able to work independently and within a team

B.Sc. degree in Computer Science or equivalent practical experience.
