Company: Software

Location: Ramat Gan

Category: other-general

The position

Mobileye is looking for a developer to join a team that is building a state-of-the-art Data Platform.The autonomous vehicle project generates huge amounts of data and our challenge is to enable it for usage by the entire organization (DL/ML developers, Product Managers, Analysts, and more.)We are using a top-notch tech stack to solve problems – multiple databases and big data frameworks, data streaming, AWS infrastructure on a large scale, and many more.

What will your job look like:

Work on a large-scale system from its early stages and watch it evolve

Take part in the design & development of a multi-service cloud-based big data platform

Evaluate various optional technologies and take part in decision-making

Own key features and services

All you need is:

BSc. in Computer Science- must

5+ years of software development experience- must

Strong skills in Python- must

Experience in developing backend services with known frameworks (Django, Flask, or any similar)

Experience with databases (relational and schema-less) and efficient data modeling

Experience with containerized services

Advantages:

Working with AWS

Working with spark, presto, drill, and ETL flows

Working with Kafka or similar streaming/messaging platforms

Knowledge with web development concept (HTML, CSS and Javascript).

Mobileye changes the way we drive, from preventing accidents to semi and fully autonomous vehicles. If you are an excellent, bright, hands-on person with a passion to make a difference come to lead the revolution!
