Senior Deep Learning Algorithm Developer

Apply Now

Company: Algorithms

Location: Ramat Gan

Category: other-general

The position

Mobileye is a pioneering force in the autonomous vehicles (AV) industry. If you are a bright hands-on developer with a passion for making a difference - join us to make AV a reality.

What will your job look like?

Design, develop, and implement deep learning algorithms for solving complex problems.

Collaborate with cross-functional teams to understand requirements and develop solutions.

Conduct research, evaluate existing models and techniques, and propose innovative approaches to improve algorithm performance and accuracy.

Optimize existing algorithms to improve performance and scalability.

Research latest advancements in deep learning, multi-task learning, AI architectures and more, and apply them to enhance algorithm capabilities.

All you need is:

M.Sc. in Computer Science or a related discipline.

4+ Years of proven experience in developing deep learning algorithms in Python.

Experience with implementing end-to-end deep learning pipelines, including data preparation, retraining, validation and deployment.

Proficiency with deep learning frameworks such as TensorFlow, Keras and PyTorch.

Excellent problem-solving skills

Advantages:

PhD in Computer Science or a related discipline.

Proficiency with C++ development.

Experience with AWS.

Proficiency with Linux environment, virtual environments, and Docker containers.

Experience with implementation of hardware-aware Deep Neural Networks.

Mobileye changes the way we drive, from preventing accidents to semi and fully autonomous vehicles. If you are an excellent, bright, hands-on person with a passion to make a difference come to lead the revolution!
