Senior Full Stack Software Engineer - Threat Intelligence Engineering

Apply Now

Company: Microsoft

Location: Israel

Category: other-general

Overview

Security represents the most critical priorities for our customers in a world awash in digital threats, regulatory scrutiny, and estate complexity. Microsoft Security aspires to make the world a safer place for all. We want to reshape security and empower every user, customer, and developer with a security cloud that protects them with end to end, simplified solutions. The Microsoft Security organization accelerates Microsoft's mission and bold ambitions to ensure that our company and industry is securing digital technology platforms, devices, and clouds in our customers' heterogeneous environments, as well as ensuring the security of our own internal estate. Our culture is centered on embracing a growth mindset, a theme of inspiring excellence, and encouraging teams and leaders to bring their best each day. In doing so, we create life-changing innovations that impact billions of lives around the world.

The TI Engineering team is focused on building cutting edge solutions, countering adversary-based threats to Microsoft and its customers through dissemination of threat intelligence, proactive hunting, incident response, and the development of new solutions and methods to detect adversary activity, investigate and respond to the attacks.

Our mission is to monitor, disrupt, and shield against cyber threats by the most sophisticated actors.

We use state of the art cloud technologies, big data solutions, AI at hyper scale and modern UX platforms to deliver the highest value for our customers.

Are you passionate about building next-gen security services?

Are you excited about Security and Cloud technologies?

Are you looking for a live, fast-paced environment, where you can make an impact and grow?

Microsoft's mission is to empower every person and every organization on the planet to achieve more. As employees we come together with a growth mindset, innovate to empower others, and collaborate to realize our shared goals. Each day we build on our values of respect, integrity, and accountability to create a culture of inclusion where everyone can thrive at work and beyond.

Qualifications

Qualifications

7+ Years of technical engineering experience with coding in languages including, but not limited to, C, C++, C#, Java, JavaScript, or Python

Bachelor's degree in computer science, or related technical discipline

Experience with designing highly available large-scale systems.

Solid knowledge of algorithms and data structures.

Extensive experience with one or more modern web technologies such as .NET / Node / React / Angular, building RESTful APIs

Excellent analytical, problem-solving, and debugging skills with a solid understanding of object-oriented design, coding patterns, and testing practices.

Adaptability to handle ambiguity, comprehend key business needs amidst competing priorities, and apply appropriate technology and implementation to the solution.

Leadership capabilities

Positive, proactive and resilient with can do approach.

Passion for software development

Responsibilities

Engage with stakeholders to gather user requirements, ensuring a thorough understanding of their needs and the intended functionality of the software.

Create a clear and robust designs that addresses the requirements, is scalable, maintainable, and facilitates seamless integration with existing systems.

Develop high-quality solutions by writing clean, efficient, and testable code that adheres to industry standards and best practices.

Ensure smooth transition of services to production by managing deployment processes, and actively monitor system performance and health to maintain service reliability and uptime.

Engineering Excellence: Uphold high standards of engineering by continuously refining processes, adopting innovative technologies, and fostering a culture of technical excellence and continuous improvement.

Benefits/perks listed below may vary depending on the nature of your employment with Microsoft and the country where you work.Industry leading healthcareEducational resourcesDiscounts on products and servicesSavings and investmentsMaternity and paternity leaveGenerous time awayGiving programsOpportunities to network and connect
