Defines the use of compute resources to maintain service and budget - Design and Engineering of all Database platforms.

Be the top authority on Oracle database.

Design and implement solutions interacting with the applications teams.

Automate processes and perform tuning for best performance.

Size and build new database solutions, keep the systems current and secure by designing and implementing a patching policy.

Monitor databases health and performance.

Implement, Approve, and Deploy changes for new and ongoing projects – Service now.

## Quest STAT

Consists of the highest professional authority in the DBA field of expertise.

Manage OCI Oracle DB & EBS cloning, Patching, Upgrade.

Keeping DR system in sync with the production environment

Provide support to all change migration activities like deployments to production and non-production environments.

Let's Talk about who we are looking for:

Experience in leading a team of DBA experts

10+ years of experience working on a large Oracle EBS implementation in a large global enterprise using: Oracle database 11,12,19C EBS suite (R12) and OCI Oracle SOA, OBIEE, BEPL, Web services, RAC Dataguard, RMAN Bash / Shell scripts

Willing to be on call

DB and application system upgrade experience

Excellent collaboration skills

MS SQL knowledge is a benefit

Ability to develop professional concepts and solve professional issues at high complexity levels

Required to implement creativity and innovation in their field of expertise.

Contribute to data recovery, maintenance, data integrity, and space requirements for physical database being met through formulations and monitoring of policies, procedures, and standards relating to database management.

Audit the current environments, provide capacity planning and best practices for the future production /development / test environments, which may include establishing new standards and procedures.

Manage Service Now ticket queue and measure and promote efficiency in the processing

and completion of tickets.

We hire innovators with the passion, creativity, and drive to answer constantly shifting market challenges and deliver impactful results for our customers.

With Verint, you'll be part of a community that empowers you to set your own development goals and provides the support you need to achieve them. Your ideas will be encouraged from the very beginning, this is how we enable innovative, out-of-the box thinking. You can really make an impact here.

So, what do you say? Let's Talk.
