Company: Palo Alto Networks

Location: Tel Aviv-Yafo

Category: other-general

Job Description

Your Career

We are looking for a top-notch Sr software automation engineer to drive our test efforts across the company. As our engineer you will be in charge of, first and foremost, product quality, design and plan required quality assurance tests, you will develop automation tests and needed infrastructure together with deployment to all known cloud providers using python, and working closely with a development team to address issues that were discovered. The job is deeply hands-on and requires a deep understanding of the product, the environments it runs.

Your Impact

Work closely with our engineering teams to understand business requirements

Create detailed and well-structured test plans based on requirements and features crew meetings

Design and writing the infrastructure and progression tests for new features

Use your knowledge to perform thorough regression testing

Identifying, reporting, documenting and tracking defect/bug issues

Investigate, analyze and find the root causes for failed systems and software

Ability to effectively communicate with all levels of the organization

Excellent verbal and written communication skills

Strong focus on customer satisfaction

Qualifications

Your Experience

At least 4 years of experience as a QA automation

Experience with Linux- MUST

Experience in one of the following languages - Python /Java/ Go - must

Experience with cloud-native technologies like Docker, Kubernetes, etc - Advantage

Experience with UI/Web manual/automation testing - Advantage

Ability to learn new technologies superfast

A strong passion for product quality and continuous willingness to improve the product

Additional Information

The Team
Our QA engineers are a part of the engineering team. The core of our products – connected directly to the mission of preventing cyberattacks. We are constantly innovating – challenging the way we, and the industry, think about cybersecurity. We define the industry, instead of waiting for directions. We need individuals who feel comfortable in ambiguity, excited by the prospect of a challenge, and empowered by the unknown risks facing our everyday lives that are only enabled by a secure digital environment.

Our Commitment

We're trailblazers that dream big, take risks, and challenge cybersecurity's status quo. It's simple: we can't accomplish our mission without diverse teams innovating, together.

We are committed to providing reasonable accommodations for all qualified individuals with a disability. If you require assistance or accommodation due to a disability or special need, please contact us at .

Palo Alto Networks is an equal opportunity employer. We celebrate diversity in our workplace, and all qualified applicants will receive consideration for employment without regard to age, ancestry, color, family or medical care leave, gender identity or expression, genetic information, marital status, medical condition, national origin, physical or mental disability, political affiliation, protected veteran status, race, religion, sex (including pregnancy), sexual orientation, or other legally protected characteristics.

All your information will be kept confidential according to EEO guidelines.

#LI-SS2
