Role Description

We are looking for a talented Senior SW Development Engineer

You will report to the Director of Core Software, Broadband business unit

Location

Hybrid role – working at least 3 days a week from our offices in Caesarea

What you will be doing:

In this position, you will lead one of our global SW Scrum teams.

The position involves C/C++ development of next-generation cable industry-leading products, services and systems for Harmonic.

Successful candidates for this position will be exposed and experienced with advanced C++ technologies, containerized solutions (k8s) and various networking environments which developed and runs under Linux servers and using cutting-edge technologies and techniques.

As part of the role, you will be involved in the following areas:

C/C++ code development of the MAC and upper layer protocol domain and been involved in cutting-edge features as part of R&D team

Investigations and debug of complex issues both from Harmonic QA and various Customers

Plan and develop in Agile development approach

What you should have:

B.Sc. in computer science / SW engineering / electrical engineering

7+ years of experience in designing, developing, and maintaining software applications using the C++ programming language

Experience in Networking

Experience with Multi-threading, OOD and Design pattern

Experience with development under Linux operating system

Experience developing in Python – advantage

DOCSIS / DPDK knowledge – advantage

At Harmonic, we believe that building and nurturing a global team with diverse backgrounds and voices is critical to our success. Together, we achieve excellence through creativity and innovation, build relationships based on integrity and mutual respect, and deliver the highest quality in every aspect of our business for the benefit of our employees, business partners and shareholders.
