

## Software Architect

[Apply Now](#)

Company: Software

Location: Petah Tikva

Category: other-general

### The position

Mobileye's EyeC Radar group develops innovative high-performance Imaging Radar solutions for ADAS and Autonomous Driving markets. We are looking for a **Software Architect** to join the development of state-of-the-art products in mmW frequencies. You will be part of a winning team in a fast-paced startup-like environment, working on many different components of the entire system. You will have an opportunity to make an impact on the design and implementation of an innovative technology in its early stages

### What will your job look like:

Clearly define the requirements. Research the hardware, firmware, and software existing support and define the solution to match the requirements.

Resolve issues raised during implementation stages or feedback from customers.

Develop & communicate high-level designs and technical specifications

Define responsibilities of system components and interfaces

Identify risks and propose solutions in system designs

Define aspects of development; appropriate technology, workflow and standards

Evaluate existing system designs and propose improvements

Write and review formal design documents

Collaborate with other architects

Foster innovation through research, recommending the use of new technologies, processes or standards

Prepare, lead and participate in design reviews

Take part in all phases of the software development cycle

**All you need is:**

B.Sc/ M.Sc in Computer Engineering, Computer Science or Electrical Engineering.

5+ years of software development experience in C

Experience as a software architect, senior developer, and/or software team leader, developing software for complex wireless communication embedded products (e.g., networking equipment, wireless chipsets). 5+ years of experience.

Work independently

Team player with a positive attitude and a cooperative mindset

Deep understanding of technology and passion for what you do

Mobileye changes the way we drive, from preventing accidents to semi and fully autonomous vehicles. If you are an excellent, bright, hands-on person with a passion to make a difference come to lead the revolution!
