Company: CPS JOBS

Location: Israel

Category: other-general

תחום

A leading global gaming company is looking for a Senior Software Engineer to join the new cross-functional agile team focused on core and infrastructure development.

You will be developing the next generation of the company product based on the microservices architectural pattern. This is one of the most exciting and challenging projects, as we are setting as a goal to create a cloud-ready, highly customizable, platform-independent system (running on Windows, Linux, macOS). You will be using the latest tools, technologies and practices such as .NET Core, Linux, Docker, Redis, Kubernetes, DI, TDD and more. Your responsibilities will include:

Endto-end development cycle: designing, coding, code reviewing, unit testing, automated integration testing, manual testing, DevOps activities.

Integration of the older parts of the system with the newly developed microservices.

Reverse engineering older parts of the system for the further transferring to the microservices architecture.

דרישות

Team player with great communication skills. Independent, responsible, initiator – Must

3+ years of backend development experience building large scale Web based systems using .NET Framework/.NET Core – Must
