

Software Network - Application Engineer.

[Apply Now](#)

Company: Cisco

Location: Caesarea

Category: other-general

What You'll Do

We're looking for an experienced Application Engineer; You'll be working as part of the Silicon One team, interacting with Cisco products groups, both on software and hardware aspects, support developing, based on Leaba architectures, the tomorrow's leading network infrastructure solutions.

Working on implementation and integration, support activities with various Cisco new generation products systems developed around the Leaba Silicon. Providing product support, troubleshooting, debug, and resolve the issues, and provide actionable data to our internal team, SW and HW.

As part of this role, you will be working very closely with both internal engineering, SW and HW, and with the products SW team to guide them throughout their system development.

- * Analyze and debug next-generation Cisco's systems products with their technical issues and inquiries.
- * Provide and be the centric guidance and support for Cisco engineering teams.
- * Hands-on diagnose and troubleshooting, working on networking protocols for switch/router and infrastructure products.
- * Work closely with Cisco System product development teams, understanding the applications the data path required and help them by bridging the knowledge on the various aspects related
- * Mange and build up with our customers, hands-on debug skills and methodologies

* Transform specialized knowledge of Leaba methodology and state of the art architectures to our System Product engineering teams.

Who You'll Work With

You'll be joining our Cisco Silicon One team which is the center of Cisco's SW and ASIC design.

You'll be part of our group driving our game changing next generation network devices -

Cisco Silicon One™. Our unique team works in a startup atmosphere inside a stable and leading corporate

Our design center is very unique - hosting all silicon HW and SW development disciplines inside one site.

We are transforming the industry and building a new internet for the 5G era, providing a unified, programmable silicon architecture that is the foundation of all Cisco's future routing products.

Our devices are designed to be universally adaptable across service providers and web-scale markets, designed for fixed and modular platforms. Our devices deliver high speed without sacrificing programmability, buffering, power efficiency, scale, or feature flexibility.

Cisco Silicon One™ is a revolutionary, ground-breaking technology for our customers and end users for decades to come! The Internet now has a new faster, better, safer engine!

Learn more about us right here:

Who You Are

* 3+ years of experience as an Application Engineer for software and hardware development and integration.

* Familiar and have some background level in networking, topologies and forwarding protocols (bridge and routers)

* Ready to learn and expand your knowledge in the domain of top line, next generation Cisco infrastructure products

* Is a team player with positive attitude and strong communication skills

* Strong orientation for system wise testing and debugging, a problem solver

* Enjoy learning, self-learning which can quickly ramp into new domains

* Good Knowledge on latest programming languages (Python, C++).

* Background in software/electrical engineer
