Breakthrough innovation to power the Internet for the Future

Cisco Silicon One is the only unifying architecture enabling customers to deploy the best-of-breed silicon from Top of Rack (TOR) switches all the way through web scale data centers and across service provider, enterprise networks, and data centers with a fully unified routing and switching portfolio.

What You'll Do

You will join Cisco Software SiliconOne team, a dynamic team at Cisco develop Core Software technologies at the heart of tomorrow's leading Silicon Network technology.

You will be part of the software development and design team for new, evolving projects, through high-level algorithms, understanding our Software and Firmware

In this role, you will:

• Design and develop software a newly software interfaces for out customer use

• Gain intimate knowledge of world-class silicon and programming models

• Work in close collaborating with SiliconOne Software and customers facing teams to meet the needs derived from our customers

• Responsible for learning and understanding customer requirements, with direct impact on SiliconOne product

• Learn about needs and solution which are parts of new evolving Network technologies

• Work with architecture and design teams to define the next generation of ASIC products being developed

Who You will Work With

Our unique Software, ASIC development and architect teams works in a startup atmosphere inside a stable and leading corporate

Our R&D center is very unique, hosting all silicon HW and SW development disciplines inside one team

Your role will enable you interaction with the entire team while working closely and directly with our customers and customers team

You'll be joining Cisco Silicon One team which is the center of Cisco's SW and ASIC design

The Internet, data-centers now has a new faster, better, safer engine!

Who You Are

• If you are creative and initiative person

• A brilliant software/electrical engineer, regardless of previous experience

• Programming experience (C++/Phthon) is a plus

• Experience in Networks products / protocols is a plus

• Can quickly ramp on multiple, interdisciplinary domains

• Have a B.Sc. or higher, Cum Laude (GPA 85+) from the Technion, TAU, HUJI or BGU, or are highly recommended by a Cisco employee

• Have a cheerful, positive attitude

If you are looking for a growing career, join the team of talented engineers with a proven track-record at breakthrough products

Choose a job you love, and you will never have to work a day in your life.

Now's the time to contact us!

Learn more about us:

You have a unique opportunity to join this team at an early stage and work with us to design and deliver breakthrough technologies.
