

SQL Server DBA

[Apply Now](#)

Company: my team

Location: Ramat Gan

Category: other-general

We are currently seeking a skilled SQL Server DBA to join our infrastructure team. The role involves working with diverse technologies in an environment that includes various servers, both on-premises and cloud-based, such as MS SQL Server, Elastic Stack, MongoDB, Redis, and more. As part of the infrastructure team, you will collaborate closely with development teams throughout the development lifecycle, providing support, working closely with tools, and assisting in troubleshooting. The position also involves continuous support and maintenance, updating environments, exploring and implementing new technologies, and working four days a week from our office in Ramat Gan.

Requirements

Minimum of 3 years of experience as an application DBA with MS SQL Server - mandatory.

Proven experience and high-level expertise in Performance & Tuning - mandatory.

Demonstrated experience in a multi-server/system environment with infrastructure understanding - mandatory.

Experience with SSIS - an advantage.

Experience with BI, OLAP - an advantage.

Experience with high availability solutions.

Experience with Elastic Stack, Oracle, MongoDB, RedisLabs - an advantage.

Key Qualities for Successful Performance:

Teamwork and good interpersonal communication.

Self-learning ability and quick adaptation to a changing environment.

Ability to independently drive issues.

Personal initiative and a proactive mindset.

Job Details:

Full-time position, readiness to work at all hours (night activities, on-call duties).

Availability: Up to one month's notice.

The position is open to both men and women.

Salary: Up to 25K, located in Ramat Gan.
