

VP R&D

[Apply Now](#)

Company: Kendago

Location: Kiryat Ono

Category: other-general

Kendago is a technology-backed company, that is behind some of the world's largest and most successful direct-to-consumer brands it develops with its partners. Renowned for its utilization of best-in-class digital marketing techniques, data-backed creative, and internally developed campaign management methodologies, Kendago stands as a leader in its field globally. At the heart of its operations lies a proprietary technology platform that integrates data from various sources, conducts in-depth analyses and generates a comprehensive list of campaign optimization gaps and action items. Kendago was ranked for the last 5 years in the fastest-growing companies list by Statista and Globes. Remarkably, all of Kendago's growth has been achieved organically and profitably.

Responsibilities:

As the VP R&D at Kendago, you will:

- Lead teams of BE and FE developers and QA.

- Design and develop core infrastructure modules and functional services, tackle large scale and load challenges, utilizing NodeJS and Python.

- Lead, coach, and mentor the R&D organization to foster a collaborative and high-performance culture.

Build the teams and product roadmap.

Work closely with the product manager to ensure the company's vision is effectively implemented with the highest standards.

Establish and maintain a fluent, self-maintained, flexible, and fast development process, constantly striving for improvement.

If you are passionate about technology, innovation, and leading high-performing teams, Kendago is the place for you!

Apply now and be part of our exciting journey!
